PROJECTS

Text Prediction using LSTM & RNN | Deep Learning, NLP, Python, TensorFlow/Keras

GitHub

- Built an LSTM/RNN-based text generation model on scientific quotes using TensorFlow/Keras.
- Applied preprocessing (tokenization, padding) and trained the model to predict next words and generate coherent text.

YouCode — Online Code Judge | Node.js, React.js, JavaScript, Express.js, MongoDB, C++, Tailwind CSS

- Developed an online coding platform with real-time C++ execution and REST API integration
- Integrated video-based solutions and standardized evaluation for an enhanced and consistent problem-solving experience.

EXPERIENCE

Strainer Technologies

June 2025 – July 2025

Data Science and Analytics

- Trained in machine learning algorithms, model building, and feature engineering.
- Implemented CRUD operations in relational databases using SQL.
